## Summary of Results

Well done! Based on the Tali Detect assessment, Sally has a lower likelihood of experiencing attention vulnerabilities. If you would like to help Sally maintain and build upon her attention skills, there are a number of attention-strengthening activities and games that can support the ongoing development of Sally's attention skills.

Tali Detect is not a designed to be a stand-alone tool or a replacement for a complete diagnostic attention assessment carried out by a qualified healthcare professional. As such this report should not be taken as medical advice. The results of Tali Detect may vary depending on the time of day, the environment and whether the child understood the requirements of the exercises. If you have concerns about the results of this assessment then we recommend contacting your doctor or paediatrician who can provide advice on child health professional services in your local area.
